

SAFETY BARRIER FENCE

Product Code: SBF4100

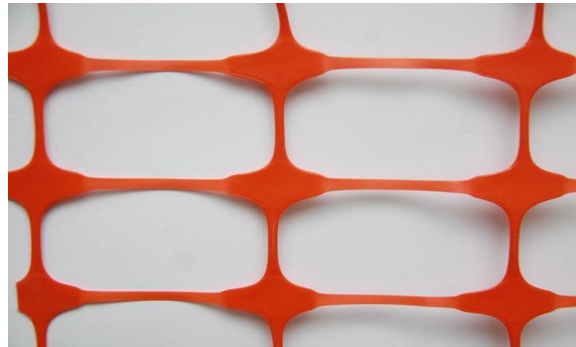

Pallet Quantity: 100 rolls

Description: Con-Dri's safety barrier fence is a high visibility warning fence made of high density polyethylene. Barrier fence can be installed on wooden stakes, metal rods, traffic cones, or other support structures. The oriented grid design of Con-Dri's safety barrier fence makes it one of the lightest, yet strongest products offered in the market today.

Use: There are a wide array of uses for Con-Dri safety barrier fence, including construction warning barricade, crowd control, temporary construction safety fencing, etc.
